TITUS

Titus Connect. Integrate your LMS

Connect your learning platform with the systems your organisation relies on.

We empower people to improve the world through learning.

TITUS

Integrate, Automate, Elevate.

We empower people to improve
the world through learning.

What is Titus Connect?

Titus Connect allows you to integrate your LMS with different systems, simplifying admin heavy tasks and creating a seamless experience for both your learners and L&D teams.

the world through learning.

Unlock Improved Communication and Efficiency

Connecting the systems you use across your organisation leads to improved communication between functions, reducing the heavy lifting and the risk of human error. What's more, it frees up your team's time, so they can focus on the more impactful tasks, like learning strategies and improving engagement.

We empower people to improve the world through learning.

Automate admin-heavy tasks

One of the most compelling reasons to invest in Titus Connect is the cost and time savings presented by automating the transfer of data. Performing data transfers manually takes valuable time away from your most impactful work, and in some cases requires an entire team to manage.

With Titus Connect, these types of tasks are a thing of the past, and the need for multiple stages of data entry is entirely removed.

Increase visibility of your data

Having clean and concise data is no longer a "nice to have." It's an essential part of modern business, and allows leadership teams to accurately report on important KPIs like ROI and employee engagement. By integrating your systems, you'll gain a clearer picture of your data, which will allow you to make data-driven decisions.

We empower people to improve the world through learning.
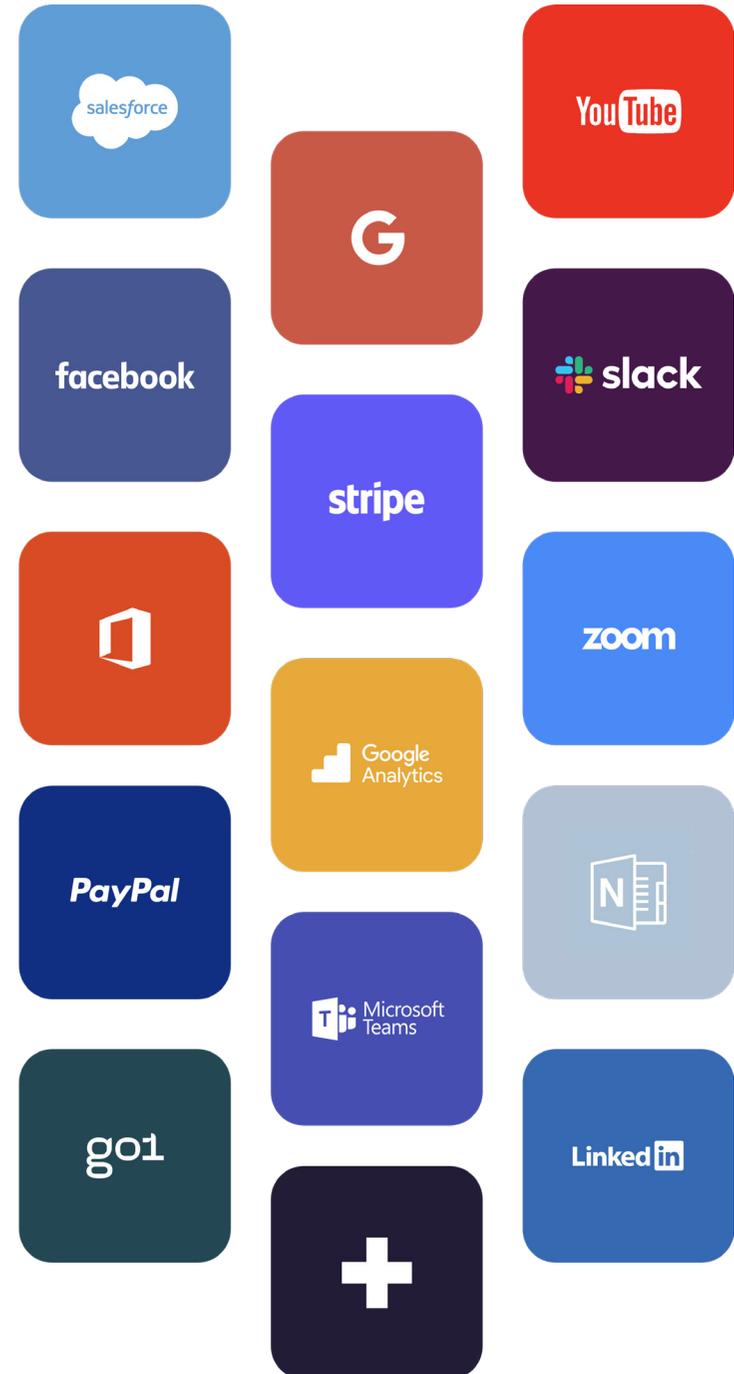

Create a Single Source of Truth

Silos within departments can hinder your organisation's progress. Titus Connect helps create a single source of truth, providing visibility into all activities. Integrating the systems your teams use is the first step to gaining a birds eye view of your organisation, and will allow for seamless communication. With enhanced reporting and analytics, every level of your organisation will be empowered to make better decisions.

TITUS

What systems does Titus Connect work with?

Titus Connect seamlessly integrates with any system that has an API. Most modern systems fulfil this requirement, making Titus Connect compatible with the majority of platforms. We'll collaborate with you to identify the most valuable integration opportunities for your organisation.

We empower people to improve the world through learning.

Types of systems that Titus Connect allows you to integrate with

CRMs

Customer Relationship Management systems like Salesforce and Hubspot are one of the most popular types of integration — especially for organisations with ecommerce requirements or where they offer learning content to external users.

Titus Connect allows you to automate profile creation, course enrolment and shares course completion data back to your CRM for an accurate view of how your customers interact with your content.

HRMS & HRIS

Integrating your LMS with your Human Resources Management System is a great way to understand how your team interacts with your learning platform.

As well as providing a clear view of your data for reporting and analytics, it can help streamline employee onboarding, improve L&D outcomes, enforce mandatory compliance learning and greatly improve your teams overall experience.

TITUS

And more...

Talent Management

Integrating your Talent Management System and your LMS allows you to take L&D and team development to the next level. Not only will it make performance reviews more impactful for managers, it allows you to create personalised learning pathways, which leads to better learner engagement and outcomes.

Accounting System

Providing better financial accuracy for your accounting and operations teams, integrating accounting software with your LMS provides a seamless purchasing and payment process — which leads to less cart abandonments and more revenue.

It can provide valuable insights for budgeting and financial planning for leadership teams. Another benefit is the reduction of administrative time required — meaning your teams can spend their time on more impactful work.
